Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The abstract of the disclosure is objected to because of the use of phrases, which can be implied, such as "The apparatus includes" on line 1, which should be avoided. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burch (U.S. Patent No. 5,403,432).

With respect to Claims 1-12, Burch, Figures 1-6, teaches a wallpaper installation apparatus comprising a section 14-16 having front and rear end portions; an arcuate section integral section 10 integral with the other section having an outer surface extending outwardly away from a wall and forming an opening therebetween. Burch does not use a plurality of holes for inserting fasteners. However, Burch uses integrated elements 17 for the purpose of fastening. It would have been obvious to one of ordinary skill in the art that these fasteners or any other fasteners would work equally well for the purpose of attaching the apparatus to the wall.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
